PROFESSIONAL SUMMARY

Full Stack Web Developer with 4 years of experience building scalable SaaS platforms, EV discovery tools, and enterprise inventory systems. Proficient in MERN stack, Next.js, and modern front-end frameworks. Skilled in cloud deployments, secure backend systems, and real-time applications.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Redux, Zustand, Tailwind CSS, Chakra UI, Shadcn, HTML, CSS, HTMX, Alpine.js
Backend: Node.js, Express.js, Go (Golang), Socket.IO
Databases & Storage: MongoDB, AWS S3
DevOps: CI/CD, Vercel, GitHub Actions
GitHub Version Control: GitHub, Fossil SCM
CMS: Payload CMS

EXPERIENCE

Software Development Engineer

01/2025 – 04/2025
Chennai

Auditcue

- Designed and developed fully responsive, performance-driven web interfaces using **HTMX, Alpine.js, Tailwind CSS, and Go** to support streamlined audit workflows from planning to reporting, including evidence requests and documentation.
- Built a rich text editor with advanced formatting, version control, and audit-trail support to manage SOPs, policy documents, and working papers within Auditcue's document lifecycle framework.
- Created modular, reusable UI components to ensure consistent interactions and accelerate the rollout of new features for risk assessment dashboards and customizable controls.
- Applied clean coding practices and maintained a scalable, secure codebase using **Fossil SCM**, ensuring high availability and reliability for critical audit and risk workflows.
- Collaborated with designers and backend developers to enhance workflows for audit cycles, evidence submission, risk visualization, and document approval—improving overall GRC efficiency.

Tech Stack: HTMX, AlpineJS, Tailwind CSS, Go, HTML, CSS, JavaScript, Fossil SCM

MERN Stack Developer

11/2023 – 11/2024
Gurugram

Evfy

- Designed and developed user-friendly web applications using **Next.js, Payload CMS, Express.js, MongoDB, and Tailwind CSS**, enabling smooth EV browsing and feature-rich comparison interfaces.
- Implemented **secure JWT-based authentication**, ensuring reliable user access and session management.
- Streamlined content workflows by integrating **AI for form automation**, reducing manual effort in content creation and maintenance.
- Implemented **fuzzy search functionality** for efficient and user-friendly vehicle search, improving discoverability of EV models even with partial or misspelled queries.
- Managed backend deployments on **AWS EC2**, established environment configurations, and set up CI/CD pipelines; also integrated **AWS S3** for efficient media storage and delivery.
- Deployed frontend on **Vercel**, leveraging its global edge network to optimize load times and reliability.
- Crafted responsive design ensuring accessible and visually coherent EV browsing experiences across devices.

Tech Stack: NextJS, Payload CMS, Tailwind CSS, Express, MongoDB, Zustand, JWT Tokens, AWS S3 bucket, TypeScript, HTML, CSS, JavaScript, Shadcn, Github

Full Stack Web Developer

01/2021 – 10/2023
Hyderabad

Zestwings

- Designed and developed a complete **Inventory Management System** from scratch using **React, Node.js, Express, MongoDB, and Socket.IO** to help businesses manage stock levels, suppliers, and purchase orders effectively.
- Implemented **role-based access control** (Admin, Manager, Staff) for secure, multi-level user permissions and data privacy.
- Built **real-time stock tracking** with automated low-stock alerts and reorder logic, ensuring timely procurement and reducing operational disruptions.
- Developed **interactive dashboards** and analytics visualizations to monitor stock movement, inventory value trends, and supplier performance.
- Integrated **audit logs** and **user activity tracking** to enhance accountability, compliance, and operational transparency.
- Collaborated with stakeholders to customize the system for different client needs, ensuring scalability and adaptability for future feature enhancements.

Tech Stack: React, NodeJS, Express, MongoDB, Redux, JWT Tokens, HTML, CSS, JavaScript, Github

PROJECTS

Gym.com

Gym.com with our creativity along with frontend and backend integration & its Fully Responsive e-commerce web application

A collaborative project built by a team of 5 members executed in 5 days

Features: Landing Page, Product page, Admin Page, Footer, Header, Cart Page, Wish List, Authentication, JWT, Payment Gateway, Password Hashing, Email service

Tech Stack: React, Chakra-UI, NodeJS, Express, MongoDB, Redux

Areas of responsibility

- Built Products Page
- Built Single Product Page
- Implemented Cart Functionality
- Developed Login, Sign Up and Reset Password Pages

Licious

Licious is an e-commerce website through which users can purchase different kinds of cold cuts such as meat and fish

This project was individually built in 4 days

- **Features:** Landing Page, Product Cards, Carousel Functionality, Footer, Header
- **Tech Stack:** HTML, CSS, JavaScript

EDUCATION

Bachelors of Technology (Electrical and Electronics Engineering)

REVA University

08/2016 – 05/2019
Bengaluru
